Admiral Badger Declares Recommendation More Men Was Reduced.

TELLS GREAT NEED OF PACIFIC FLEET

Possible Perils That Influenced Navy Board To Be Revealed in Executive Session.

Washington, Feb. 23. Admission that the Secretary of the Navy had so changed the report of the General Board last year that a recommendation of an increase in the navvy of about 17,000 men was greatly reduced was obtained to-day from Rear Admiral board. The officer, formerly commander in chief of the Atlantic fleet, was appearing before the House Naval

Affairs Committee. Admiral Badger's statement contradirted the statement of Secretary Danhe had "no recollection" of such a report having come to him from the General Board. Admiral Badger was with the following: somewhat hazy about the exact changes

made in the report. Chairman Padgett became annoyed by the questioning of the officer along hypothetical lines and declared he F. R. Funk Says Illinois would shorten the hearings and adjourn them if it were continued. His remark was directed at Representative ness member.

Admiral Badger said that ultimately An abnormal export trade from the it was intended to establish a modern crops, according to F. R. Funk, a stronger than "any enemy which it

By ALICE BARROWS FERNANDEZ

Tribune readers will find in this department a clear and authoritative account of the Wirt school system, proposed for this city. Questions of parents and teachers will be gladly answered. The department will appear on Mondays and Thursdays.

WHAT THE WIRT PLAN DOES. It takes children off the streets and keeps them wholesomely busy at work, study and play for all or

seven hours a day. It gives all children just as much cademic work as the traditional school, but by lengthening the school day it gives time for practical shop work, science, drawing, music, auditorium and play for all children.

WHAT THE WIRT PLAN MEANS.

To every parent-A chance to give his child the enriched educational opportunities usually reserved for the children of the favored few.

To teachers No more hours of teaching; more congenial work To the community-Better citizens, better schools for less cost.

Charles J. Badger, a member of the Departmental System Benefits Teacher and Child-Teacher Has Charge of Child Longer-Willcox Calls Buckingham Tests Unfair to Gary Plan.

Last Monday we answered five of ten questions in regard to the iels to the committee a month ago that Gary system submitted by the principal of the University School, New Haven. To-day we take pleasure in finishing the other five, beginning

"I abhor the elective system and departmental teaching by specialists at the present day as one of the reasons why American education is so flabby, superficial and effeminate, as compared with education in England, France and Germany. Then, how is it going to improve the fibre and tone of American education to shove the departmental instruction clear down to the kindergarten?"

For the benefit of the layman, we would explain that the "departmental system" means letting teachers teach a subject that they know Callaway, of Texas, an anti-prepared best and like best; and letting children have the benefit of being taught by eachers who have a thorough mastery and love of the subject which they are teaching. Under this system the child, instead of having one teacher all day, has one teacher in academic work, one in shop, one in for war materials and provisions from the Atlantic force at all. The fleet now science, in music, in playground work, and auditorium. The usual argu-European countries, has resulted in the there, he said, in answer to questions ment urged against such an arrangement is that, as the child is not Eastern railroads detaining thousands by Representative Stephens, of Califor- under the supervision of one teacher all day, he fails to get the benefit of the "mother love" which is possible when one teacher is in charge of

TEACHER HAS CHARGE OF CHILD LONGER UNDER GARY PLAN.

A little examination, however, of the present system shows that teacher has supervision over a child hardly long enough to develop even a stepmother love for him. For example, a child spends eight years in the elementary school and he changes teachers every five months, which means that he has sixteen teachers in the eight years.

Under the Gary plan, however, he has one academic teacher during the whole ten months of each year; that is, eight teachers in academic work instead of sixteen. Moreover, he has the same teachers in science in shop, in drawing, in music, in play, and auditorium, from the third grade through the elementary school and high school. In other words, each academic teacher under the Gary plan has a child twice as long as under the present system, and the teachers in special work can watch

lomatic relations.

International consideration, which moved the Navy General Board to change its time-honored policy last year and declare that the United States havy should equal the strongest afloat by not later than 1925, will be disclosed by not later than 1925, will be disclosed to the committee to morrow in executions. As for the teacher, it is difficult to understand why she should not prefer to teach the subject which she knows and likes best. It does not by not later than 1925, will be disclosed to the committee to-morrow in executive session by Admiral Badger. Examination of the admiral in open session was ended to-day. He consistently refused to discuss, except behind closed doors, the board's views of dangers that may confront the nation.

The subject came up when Mr. Stephens asked if the board in altering its policy did not have in mind the possibility that the country might have to face simultaneously enemies in the Pacific and Atlantic oceans.

It is sometimes alleged, however, that the departmental system means stand to reason that one person can do everything equally well, and cer-

It is sometimes alleged, however, that the departmental system means car owned by another road is required to pay the owner only 45 cents a day interest shifted in addition to the parent concern and interest shifted in the return of the car. "It may readily be seen from this," declared Mr. Funk, "that the Eastern company of Honolulu, there were company, of Honolulu, there were individuals included in senty-seven individ He narrow "specialization," such as we have in industry. On the contrary,

From the point of view of the children there is no question but that New Central American Line.

The Pacific Steam Navigation Company, as announced by Sanderson & Son, their general agents in the United States and Canada, has recently purchased from the Salvador Railway Company the two modern passenger and freight steamers Acajutla and Salvador, and intend to establish a frequent sersibility.

Wouldn't Change Britain's Policy.

Admiral Badger expressed the opinion that should the United States adopt a two-power standard navy, such as a same of the United States adopt a two-power standard navy, such as a same of the Company of the children there is no question but that it is good for them and that they like it. One small boy in a Gary school summed it up when he was asked whether he liked having different teachers, then if one gets a grouch on the first thing in the day, she can't keep soaking it into you all day long."

"Is not the opportunity for religious instruction in church and Sunday school far more practicable under the present system when all pupils can assemble together at 4 in the afternoon, say, just as they

do on Sunday, rather than under the Gary system, when they appear in separate detachments and driblets through a period of six hours, covering both morning and afternoon?"

DISTRIBUTING PEAK LOAD ECONOMICAL AND PRACTICAL.

We have always understood that it was a fundamental principle in efficient management that the distribution of the peak load made for nomy and efficiency. We should suppose that taking care of 1,600 children, for example, between the hours of 4 and 6 p. m. would be more difficult than taking care of two hundred every hour of the day.

"Explain in detail the great educational value of organized play

and show its great superiority over natural play." Under the conditions of modern city life children no longer have the would have to be dealt with."

Force and Diplomacy.

Admiral Badger repudiated a surgestion that military men viewed all international problems from the standard point of force, while statesmen looked upon force and diplomacy as equal arms of government.

"Ultimately, however," he "dded," diplomacy depends on force. When diplomacy fails it must either abndoints object or call on force."

"Ultimately, however," he "dded," diplomacy fails it must either abndoints object or call on force. When diplomacy fails it must either abndoints object or call on force."

Admiral Badger refused to get the United States fleet ready for action against first class power. His attention was called to a statement to the condition his opinion as to the time it would require to get the United States fleet ready for action against first class power. His attention was called to a statement to the condition. The war strength will be fixed at the conditions of public playeround instructors who know how to make the supervision of public playground instructors who know how to make tryanized play natural.

Last Monday, owing to a typographical error, it was reported in this column that we did not consider the report of David Snedden, Massachuster for the regular army, agreement being reached upon its main feature.

The bill will provide for a peace strength standing army of 175,000 mercas against 135,000 proposed by the House bill under consideration. The war strength will be fixed at 225,000. A seven-year enlishment, three with the colors and four in the reserve with the colors and four in the reserve at the end of against the rystem which we have had the privilege of reading.

in St. Rita Vestibule.

Detroit, Feb. 23.—Immigration as it affects and is affected by the public schools of the United States was the keynote of addresses and discussion to day at the meeting of the Department of Superintendence, one of the twenty-one organizations affiliated with the National Educational Association, holding annual meetings here.

Speakers were inclined to criticize so-called old-fashioned methods of educating children of immigrants. Two or three educators verbally tore to please what they termed the general plan used in trying to acquaint foreign born children with the fundamental principles of American government.
